
Controlled ablation on DSH agents, 2026-11-09: 3 rounds x 6 abstracted tasks, same-window latin square, 36/36 artifacts, first pass 18/18 per arm, zero fallback / human interventions (E6=0). n=3; no significance test claimed. A1 cuts makespan 34% with 3x lower variance, at +1.3 turns and +57% context bytes per task. Verdicts: H1 supported · H2 unsupported at small payload (payload-scale dependent) · H3 supported · H4 parity (18/18 first-pass both arms).
